Climate Vocabulary

WORD MEANINGS

Read the meanings, then try using a new word in a sentence.

Climate
The usual weather patterns of a place over many years.

Weather
The conditions outside at a particular time, such as rain or sunshine.

Atmosphere
The layer of gases surrounding Earth.

Humidity
The amount of water vapour in the air.

Drought
A long period with much less rain than usual.

Monsoon
A seasonal change in winds that often brings heavy rain.

Tropical
Relating to the warm region around the equator.

Temperate
Relating to regions between the tropics and the polar areas.

Polar
Relating to the cold regions around the North or South Pole.

Arid
Very dry, with little rainfall.

Rainfall
The amount of rain that falls in a place over a period of time.

Emissions
Gases or other substances released into the air.

Methane
A gas that traps heat in the atmosphere, contributing to warming.

Warming
A rise in temperature; global warming is a rise in Earth's average temperature.

Adaptation
A change that helps people or living things cope with new conditions.
