Psychology Vocabulary

WORD MEANINGS

Read the meanings, then try using a new word in a sentence.

Behaviour
The actions of a person or animal.

Cognition
Mental processes such as thinking, learning and remembering.

Perception
How the brain interprets information from the senses.

Attention
Focusing mental effort on particular information or a task.

Memory
The ability to store information and recall it later.

Emotion
A feeling such as joy, sadness or fear.

Motivation
Processes that encourage someone to act or pursue a goal.

Learning
A lasting change in knowledge or behaviour through experience.

Reward
Something desirable given after an action, which can encourage that action.

Trait
A characteristic that helps describe a person, such as patience.

Empathy
Understanding or sharing another person's feelings.

Bias
A tendency that can influence judgement, sometimes without awareness.

Hypothesis
A proposed explanation or prediction that can be tested.

Experiment
A study that changes a factor to investigate its effects.

Stress
A response to demands or pressures that feel challenging.
