

Finished Size: The dice measures approximately **5 cm on each side** when assembled.

For younger children, adult help is required!

1. **Cut out** the dice shapes carefully along the outer lines.
2. **Fold all tabs** along the lines so they bend inward. Take your time folding for neat edges.
3. **Apply glue** to the tabs one at a time and attach the tabs to the matching sides to form a cube.
4. **Hold each tab in place** for a few seconds until the glue sticks. Optionally, add a small piece of clear tape over the tabs for extra strength.
5. **Let the glue dry** fully before using the dice
