Maths Vocabulary

WORD MEANINGS

Read the meanings, then try using a new word in a sentence.

Parallel
Lines in the same flat surface that stay the same distance apart and never meet.

Infinity
The idea of having no end or limit; it is not an ordinary counting number.

Sum
The result of adding numbers together; the sum of 3 and 4 is 7.

Product
The result of multiplying numbers; the product of 3 and 4 is 12.

Divisor
The number you divide by; in 12 divided by 3, the divisor is 3.

Numerator
The top number in a fraction; in 3/4, the numerator is 3.

Denominator
The bottom number in a fraction; in 3/4, the denominator is 4.

Quotient
The result of division; 12 divided by 3 has a quotient of 4.

Factor
A whole number that divides another whole number exactly; 3 is a factor of 12.

Multiple
A number made by multiplying a number by a whole number; 12 is a multiple of 3.

Perimeter
The total distance around the outside of a flat shape.

Area
The amount of flat surface inside a shape, measured in square units.

Radius
The distance from the centre of a circle to its edge.

Diameter
The distance across a circle through its centre; twice the radius.

Equation
A mathematical statement showing that two expressions are equal.
